

BizTalk

Improve team collaboration and increase business productivity

The BizTalk service completely eliminates the need for physical contact between employees, business partners and customers and reduces travel expenses. At the same time, it increases productivity and saves time. Clear audio and HD video create an immersive experience for all participants. Thanks to the BizTalk service your meeting can take place anywhere and at any time. All you need is a computer, a tablet or a smartphone.

The BizTalk service is a complex, cost-efficient and reliable communication solution for businesses of all sizes. Enjoy a conference which is much more efficient than the traditional management meetings.

- Get exceptional video quality (1080p @ 30fps)
- Start a videoconference with two or multiple participants with a single click
- Integrate videoconferencing with different terminals and networks

Thanks to our flexible solution you can communicate and collaborate with your staff in remote locations. Once you order the service, SWAN will supply all necessary videoconferencing equipment, including user support.

You can start a videoconference from anywhere via the internet or your corporate network, using a desktop PC, a notebook, a tablet, or a mobile phone.

Service advantages

- Enjoyable real-time video communication
- Limits physical contact
- Resource optimisation - reduce costs by limiting travel
- High-quality sound and HD video for an excellent user experience
- Ability to connect multiple users
- Universal, secure and easy-to-use video platform
- Access via mobile devices and the internet
- Contractual service guarantee covering all your branches

Service use

- Business continuity management
- Compliance with quarantine and social distancing requirements
- Virtual meetings between employees, suppliers and customers
- Collaboration tool allowing to share your desktop or application
- Possibility to connect from your office, home, backyard or car
- Opportunity to organise more frequent training sessions for sales reps working from remote locations
- Excellent tool for specific use cases, such as remote education, telemedicine, and new product presentations

The BizTalk tool transfers audio and video in real time between two or multiple participants. It allows them to communicate, collaborate, and present materials.

Audio and video transfer in HD quality via the internet or the corporate network. The BizTalk brings new functionalities such as the collaboration white board or an option to record videoconferencing calls. High-quality audio and video thanks to a codec correcting data errors and data loss (error concealment) and providing optimum performance without reducing service quality. The service allows users to connect simultaneously in multiple locations without any transfer delays. Intuitive user interface with one click to start a videoconference.

Control options: infrared wireless remote, touch screen, keyboard/mouse.
